Mr. Rich Tucker
Senior Approvals Engineer
Tokheim Corporation
P.O. Box 360
Fort Wayne, Indiana 46801

Dear Mr. Tucker:

Use of "Premier D" Series Dispensers

Thank you for your letter dated November 29, 2001, requesting California Air Resources Board (CARB) approval of the Tokheim "Premier D" series multi-product fuel dispenser. The "Premier D" series is identical to the currently certified "Premier C" series except for a newly upgraded electronic computer which provides expanded options at the customer interface.

Based on a review of engineering drawings and information submitted by Tokhiem, we have determined that the requested modification (electronic computer upgrade) will not impact the vapor recovery system nor will it affect the vapor recovery efficiency of the Premier series multi-product fuel dispensers. This approval is applicable to both the balance and "Max Vac" vacuum assisted configurations of the Premier series dispensers. CARB has received approval letters from California Office of the State Fire Marshall, California Department of Industrial Relations, Division of Occupational Safety and Health, and California Department of Food and Agriculture, Division of Measurement Standards.

If you have questions or need further information, please contact Laura McKinney at (916) 327-0900 or via email at lmckinne@arb.ca.gov or Lou Dinkler at (916) 445-9335 or email at ldinkler@arb.ca.gov.

Sincerely,

William V. Loscutt, Chief
Monitoring and Laboratory Division

cc: Rosa Salcedo, San Diego County Air Pollution Control District

The energy challenge facing California is real. Every Californian needs to take immediate action to reduce energy consumption. For a list of simple ways you can reduce demand and cut your energy costs, see our Website: <http://www.arb.ca.gov>.
